2-Port Aggregation Switch

1.8 Tbps high-density 100G/25G Layer 3 Etherlighting™ aggregation switch with MC-LAG support for high availability system design.

Port aggregation is useful for implementing load balancing and provides a redundant link backup. To allow port aggregation, the basic configuration on all the ports must be consistent. The following list ...

MC-LAG (Multi-Chassis Link Aggregation Group) allows two switches to work together as a single logical unit, providing both load balancing and redundancy. This setup ensures minimal downtime by ...

Get it now! USW-Aggregation is a managed Layer 2 switch with eight 10G SFP+ ports, offering link aggregation for higher capacity and increased availability.

An Aggregation or "Top-of-Rack" switch is designed to connect everything in a rack at high speeds, then have an even bigger pipe out to the rest of the network. The Pro Aggregation does this with it's ...

Professional-grade 32-port, Layer 3 Etherlighting™ switch for high-capacity 25G SFP28 connections.

I have a switch Netgear JGS524E, which supports Link Aggregation, it is my understanding that I could use two ports from that switch into my Synology's two ports and thus expand it's local network speed ...
