

# 4-input 1-output fiber optic switch

## 4-input 1-output fiber optic switch

Here is an opto-mechanical optical switch with one input port and four output ports, that is, a 1 × 4 Optical Switch). As with any other type of switch, the optical switch has many uses, ...

Sercalo Microtechnology's SC type co-axial 1xN and 2xN fiber optic switches are based on a design where a single MEMS mirror redirects light from a common fiber to one of N ports. The miniature ...

This 1x4 fiber optical switch is based on all fiber opto-mechanical technology with proven reliability. It consists of three 1x2 optical switch units, and has 1 input port, 4 output ports.

We offer solutions that provide seamless transmission and conversion from Ethernet media to multimode or singlemode fiber. Our Ethernet network switches with fiber ports comes in managed or ...

The Brimrose fiber optical switch system plays a major role in modern fiber optic telecommunication and sensing systems that demands high-reliability operation, response, and continuous high frequency ...

Shop DigiKey's large in-stock selection of Fiber Optic Switches, Multiplexers, Demultiplexers. View inventory, pricing and order now for same day shipping!

1X4 Fiber Optical Switches (single mode, multimode, 850/1300nm, 1310/1550nm) is a kind of 1 input and 4 output fibers optical path control device.

GLSUN S 1x4 optical switch is a device in fiber optic communications that allows a single input signal to be directed to one of four output ports. It's essentially a routing device used to control the path of ...

The NS Series 1x4 solid-state fiber optic switch is made up of cascaded three 1X2 switches. It connects optical channels by redirecting an incoming optical signal into a selected output optical fiber.

Altronix NetWaySP4PX provides four (4) 1Gb SFP ports and four (4) power outputs (480W total power) to be transmitted over single, multi-mode fiber as well as Hybrid Cable (fiber + copper combined) to ...
