

## 400GB optical module

## 400GB optical module

Learn how Cisco 400G QSFP-DD High-Power (Bright) Optical module's small size and low power make it an optimal choice for a wide range of DCI/Cloud, metro access/aggregation, ...

Coherent 400G Finisar Fiber Optic Transceiver Modules are designed for use in Gigabit Ethernet links on various applications, some with FEC. The modules offer hot-pluggable QSFP-DD, ...

400G SR4.2 module is an updated version of the traditional 400G SR4 module, optimized for higher performance and longer transmission distances. The main difference between ...

The 400GBASE-FR4 optical transceiver is a hot-pluggable module operating at 400Gbps and using the QSFP-DD form factor. The module integrates 4 independent optical channels operating at 100Gbps ...

This FIBERSTAMP 400G OSFP-RHS product is designed for 10km optical communication applications. The module converts 4 channels of 100Gb/s (PAM4) electrical input data to 4 channels of CWDM ...

The high performance and low power of the 400G QSFP-DD ULH module make it an optimal choice to extend Routed Optical Networking use cases to regional and ultra-long-haul ...

The NVIDIA MMA4Z00-NS400 is a high-performance 400Gb/s optical transceiver designed for next-generation data center infrastructure. This single-port OSFP module supports both InfiniBand and ...

The QSFP-40002-FR4 is a 400Gb/s Quad Small Form Factor Pluggable-double density (QSFP-DD) optical module designed for up to 2Km reach over SMF optical communication applications.

Arista's 400G-VSR4 modules will optically interop over 50m MMF with third-party QSFP112 or OSFP-RHS modules that are compliant to the IEEE 400GBASE-SR4 or 400GBASE-VR4 optical standards.

400 Gigabit Ethernet (400G) transceivers are optical modules capable of handling data rates of 400 Gbps. With a transmission rate of up to 400 Gbps, 400G transceivers offer double the capacity of ...
