451 Quota Direct Burial Optical Cable

Overview

Our cable allows for maximum performance while minimizing electromagnetic interference/radio-frequency interference (EMI/RFI) and almost eliminating alien crosstalk (AXT). Suitable for fast, Gigabit, and 10-Gigabit Ethernet and supports bandwidths of up to 550 MHz. Utility Direct burial fiber optic cables are resistant to UV radiation, abrasion, and fungus to endure the tough conditions of underground installations. These cables are engineered to resist moisture, temperature fluctuations, and physical damage, ensuring reliable performance in even the most. Check each product page for other buying options. Our Outdoor Armored Direct Burial (OSP-DB) Pre-Terminated Fiber Optic Cable Assemblies provide a highly durable and cost-effective solution for direct burial fiber optic installations without the need for additional conduit. These assemblies feature a corrugated steel armored design with a. Ribbon cables offer higher fiber counts and greater fiber density than any other cable construction designed for the outside plant (OSP), up to eight times the highest-fiber-count loose tube cable.
