

480 Gigabit Fiber Port Core Switch

480 Gigabit Fiber Port Core Switch

Explore the RBG-F4808M3-AC a Layer 3 managed all-fiber Gigabit switch with 48 SFP and 8 10G ports. Redundant power - buy now for high-density networking!

The 10G downlink port can be connected to the access layer switch or server, and the 40G/100g uplink port can be connected to the core layer switching device. The traditional 3-tier architecture has ...

This compact 1U switch delivers line rate 10GbE and 40GbE connectivity with very low latency for support of full internet routes. Optimize for your deployment with a model that provides 32 ports of ...

Discover fiber switches designed for reliable network connectivity. Browse 10G, 2.5G, and gigabit options to expand your bandwidth.

Flexible, modular switches offer hotswappable power supplies and fans for enhanced resiliency and redundancy, and up to 60W of PoE per port to power the latest IoT devices, security cameras, and ...

Aggregation switch for small and medium-sized campus networks, with four 10G uplink optical ports for high-speed data transmission; 48 x 1GE SFP ports, providing high-speed network experience for ...

The switch is 48-Port Gigabit SFP+ 4-Port 10G SFP+ L3 Managed Ethernet Switch. It is full fiber stackable routing switch with fixed, built-in 10GbE uplink ports. The fully managed switch provides ...

Mpps Layer2& Layer3 packet forwarding rate with wire-speed for all ports. The switch provides 48 GE fixed Ethernet ports, and 4 x 1000M SFP optical ports (Only for S5800-48T& S5800-24T) or 2/4 SFP+ ...

Based on an x86 CPU, the Cisco Catalyst 9500 Series is Cisco's lead purpose-built fixed core and aggregation enterprise switching platform, built for security, IoT, and cloud. The switches ...

This Switch is engineered for robust network redundancy. Its 2-unit physical stacking enables a redundant ring that preserves data integrity even if one switch fails.
