	<p>This session will provide students with a high-level overview of Military, ESA, COTS and auto grade specifications applicable to capacitors, resistors, filters and inductors.</p>
---	---

	<p>We support MIL-PRF-38535 for QMLV space grade devices, source controlled drawings for specific customer requirements, and can perform radiation testing for total dose, ELDRS, and single event ...</p>
---	--

Our products played a primary role in enabling the large-scale adoption of composite materials in the aerospace industry and have been used in multiple aerospace applications for over 25 years.

These impregnated carbon grades offer maximum resistance to corrosion, wear, and oxidation. The grades presented in the guide are only a representative sampling of our many grades. Please call for ...

The purpose of this document is to establish baseline criteria for selection, screening, qualification, and derating of EEE parts for use on NASA GSFC space flight projects.

We'll cover the critical standards you need to meet, material selection that actually matters in extreme environments, and the testing protocols that separate aerospace-grade boards from commercial ones.

For the benefit of the user, information regarding the use of this document is provided in the Introduction. This NASA EEE parts selection list is provided to all elements of NASA and is ...
