## Overview

Using the Bureau of Labor Statistics (BLS) microdata that underlies the Consumer, Producer and Import Price Indices we show that there are important common patterns in the distribution of price changes over time. We then explore the implications of this variation for. Why are the prices of distribution boxes different?

Have you ever looked at distribution boxes for your building project and wondered why some cost \$50 while others run \$500?

It's not random – the price differences come down to what's actually inside the box, literally and figuratively. Whether. Carrying costs are incurred for all inventories, while all supplier orders and transfers to the retailers incur fixed and variable costs. We first characterize the solution to the centralized system in which all retailer prices, sales quantities and the complete chain-wide replenishment strategy. Boxes for homes usually cost between \$10 and \$100 at stores like Amazon or Home Depot. These can cost from \$200 to over \$2,000. Septic distribution boxes are used in wastewater systems. This tiered

pricing model allows distributor salespeople a broader range of flexibility when pricing customers. 2) Frequency of price adjustments is correlated with variance.

## Analysis of Reasons for Price Differences in Distribution Boxes
