

# Basic Indicators of Optical Fiber Communication

## Overview

To meet demand of increase in the telecommunication data transmission. Fundamentally, a fiber optic network comprises of strands of glass or plastic fibers, encased within a protective sheath, that transmit light. Fibers commonly used in optical communication are single mode and GI. Lower transmitter. Overview Of Optics And Optical Fiber Communication: Topic Covered: History of fiber optic systems, block diagram, Fiber material, fiber cables and fiber fabrication, Propagation of light in optical fiber, acceptance angle, numerical aperture, Types and specification of optical fiber, Advantages of. birth of fiber optic sensors. The device or a tube, if bent or if terminated to radiate energy, is called a waveguide, in general.
