

Bearing-type optical cable stripping tool

Bearing-type optical cable stripping tool

Jonard Tools TK-350 Fiber Optic Stripper & Kevlar Shears Kit - Featuring Molded Pouch to Securely Hold 3 Hole Fiber Stripper and Kevlar Cutting Shears - Ideal for Fiber Technicians

Fiber strippers are precision tools that reliably and cleanly remove a defined length of coating (often 30-40 mm) from a fiber end so that the bare glass is exposed without scratching or nicking it.

Combine ball splines and bearings to create linear and rotary motion systems. Adapt the bore of a component to a smaller size for mounting on a shaft.

Trusted since 1958, Jonard's Fiber Stripping Tool is a must-have for all fiber technicians. Shop Jonard's popular collection of fiber optic cable stripper and tools now.

Bearings are crucial for smooth and efficient motion in mechanical systems, while reducing friction, wear, and noise. There are various types of bearings, including ball bearings, roller ...

The AFL Precision Strip Tool is a fast, simple, and accurate solution for stripping fiber without damage. It is battery-powered and portable, making it ideal for use in the field. The tool has an ergonomic ...

Bearing Basics (Uses, Types, and Components)
Let's first take a look at how bearings are used and the many types of bearings available. We'll also identify the main components found in rolling bearings ...

Motion's bearings are precision mechanical components designed to reduce friction between moving parts, allowing for smoother motion and enhanced efficiency in rotating or linear applications. Motion ...

Shop our fiber optic cable stripping tools, essential for removing cable jackets, aramid yarn, and buffers to ensure optimal fiber optic performance.

Browse our wide selection of bearings and other industrial products to meet your needs.

Choose from our selection of fiber optic wire and cable strippers, including electrical wire strippers, electrical cable strippers, and more. Same and Next Day Delivery.

A bearing is a mechanical part that allows linear or rotational movement and reduces friction between two objects. It eases the movement, reduces fatigue, and improves speed and efficiency between the ...

In other words, a bearing is a machine element that constrains relative motions and is used to reduce the friction between moving parts. Bearing is employed to support, guide, and ...

Fiber Optics Cleaving and Stripping Tools available from StockAMS Technologies offers the full range of must-have tools for field or production - including processing and preparation tools for several types ...

A bearing is a machine element that constrains relative motion to only the desired motion and reduces friction between moving parts.

These fiber buffer stripping tools provide a quick, easy, and reliable way to remove the buffer from an optical fiber in preparation for connectorization. A fiber guide and matched blades ensure that the ...

Efficiently handles all fiber types - strips fiber zip cord, loose tube, and tight buffered strands with equal precision. First hole exposes Kevlar strength members, second removes buffer coating, third cleanly ...

Bearing Distributors, Inc. offers bearings, oil seals, and mechanical power transmission parts. Use BDIExpress to purchase your industrial MRO parts online.

SKF offers high-quality bearings, seals, and lubrication systems for various industries, ensuring reliable performance and durability in diverse applications.

Achieve clean, damage-free strips every time with our professional Fiber Optic Cable Strippers and Wire Stripping Pliers. Featuring high-precision blades for removing 250µm coatings, 900µm buffers, and ...
