

# **C-shaped steel fixed vertical shaft cable tray**

## C-shaped steel fixed vertical shaft cable tray

PW Steel Ladder Tray can be used in outdoor and some corrosive environments. It has a C-channel side rail that is available in flange-in and flange-out configurations.

Wescosa designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Dammam Saudi Arabia.

C channel steel cable trays are usually made from mild steel which offers a great balance between strength and ease of fabrication. They can be constructed from stainless steel for enhanced ...

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable.

When fitting cable trays and their accessories, the products are cut on site to create changes of direction, adjust sections, etc. Damage can also occur during handling; as a result, both the ...

Formed side rails are welded to 15/8 in. wide rungs to provide maximum rigidity and strength. Rung design includes exclusive Ty-Rap cable tie slots on 1 in. centers.

The vertical shaft cable tray adopts light-weight design, extensively decreasing development costs, minimizing vertical shaft loads, and possessing amazing thermal conductivity, which can efficiently ...

Straight sections of solid bottom cable trays constructed from single sheet of metal, providing excellent protection from external damage. They are used primarily for intrumental control, ...

We recently merged with Ocean-1, a market leader in the supply of ABS approved cable tray systems and related support products to the Marine, Offshore, Onshore, Rig, Shipbuilding and Oil & Gas ...

We manufacture a wide range of products capable of providing the characteristics which respond to the proposed application, along with quality of assembly, speed of installation, and cost-saving cable trays.
