

CFP8 New RoHS

Overview

They are compliant with the CFP MSA1, IEEE P802. 3bs 400GBASE-FR82 and 400GAUI-162. Digital diagnostics functions are available via the MDIO interface, as specified by the CFP MSA and Finisar Application Note AN-20xx4. The transceiver is RoHS compliant per Directive. Finisar's FTCD1324E1BCL 400G CFP8 transceiver modules are designed for use in 400 Gigabit Ethernet interfaces over single mode fiber. Giving development teams the options they need to create the networking technologies of the future, these load modules are available in two different models: • Full feature and. What is the CFP Optical Transceiver Module?

The CFP optical transceiver module is a standardized, hot-swappable optical transceiver used for high-speed data transmission in telecommunications and data center networks. CFP8 Series I/O Connectors are available at Mouser Electronics. 5mm contact pitch and 16 high speed channels. It is rated for 28Gb/s per channel with resonance dampening for improved signal integrity. It is comprised of insert molding assemblies for top-side contacts and Press-Fit cage.
