

CNC punching machine for cable trays

Optical splitter cassette type refers to the port 2.0 mm / 3.0mm slip-on fiber multichannel direct output with a plastic box packaging protection and easy to use.

Optical splitter rack mount type is using metal box packaging which can be installed in 19" frame or cabinet.

Optical splitter LGX box type is ready by flame retardant material box or plate packaging. Mainly suitable for cable points fiber box and wall mounted terminal box.

Optical splitter mini type refers to the port 0.9 mm slip-on fiber multichannel direct output with a compact design and easy to use.

CNC punching machine for cable trays

Cable trays are used as an alternative to open wiring or electrical conduit systems, and are commonly used for cable management in commercial and industrial construction sides such whole piece ...

Utilizing advanced automation technology combined with precise punching, bending, and cutting processes, this machine efficiently completes the forming and processing of cable trays, meeting the ...

The electrical control system is designed with the human machine interface, range adjustment use digital scale, setting low speed position, floor level position, and operation precise and easy.

CNC punching machines with servo-electric or hydraulic drives offer high accuracy and are well-suited for regular perforation patterns along tray sidewalls.

Precision and Quality: Our Cable Tray Punching Machines ensure precise and high-quality punching of cable tray components. Equipped with precision punching tools and mechanisms, they deliver ...

Our production line is equipped with intelligent punching, roll forming and synchronous cutting modules, which can flexibly adapt to different specifications and support customized production with a width of ...

Equipped with durable rollers, robust frames, and reliable hydraulic units, the cable tray punching machine can handle a wide range of tray sizes and thicknesses. It is suitable for producing cable ...

cable tray roll forming machine automates precise forming of steel cable trays, with customizable profiles, high-speed production, and durable components. Ideal for electrical construction and ...

High-speed cable tray punching machine delivers precise holes for efficient cable tray production.

High-speed 600mm cable tray punching machine with PLC control, 3kW power, and 220V operation. Boosts production efficiency with precise perforations for cable trays.
