

Cable trays for low-voltage wiring

Cable trays for low-voltage wiring

ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia.

Cable trays and baskets are designed to help support and route cable bundles in an organized manner along ceilings or walls. Shop for cable tray systems now.

The nVent CADDY Wire Basket Tray, Round Wire is a continuous pathway solution to support high-performance cabling systems while providing an ideal foundation for datacom and electrical contractors.

MP Husky's cable tray selector for choosing the correct tray type (ladder, solid bottom, perforated, wire mesh) and size based on load, cable type and installation requirements.

This guide highlights practical cable tray rollers, pullers, brackets, and raceways that help streamline runs for Ethernet, coaxial, fiber, and other low-voltage cables.

The Flextray system is a field-adaptable way to manage cables. The tray can be cut and bent to the needs of the installer. Learn more about our wide range of sizes.

Explore precision-engineered Wire Mesh Tray built from high-quality welded steel, offering a safe, reliable pathway for low-voltage and data cables with a patented load-optimized design.

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Discover a professional 5-step guide on how to choose the right cable tray for low voltage system. Learn about types, sizing, standards for reliable installations.

Support brackets attach directly to framing members, without structural damage. NEW styles include wall mount and flat surface support brackets. They hold cables securely in place and you can open ...
