

Can fiber optic cables be connected to drop cables

Overview

It is the connection from the side of the house or multi-dwelling structure to the fiber enclosure where the drop cable is connected. Fiber Optic Drop Cable can be installed aerially on pole or a cable strand, below grade in a handhole or above grade in. Fiber optic drop cables are the critical link between the main fiber optic network and individual buildings or residences. They deliver the high bandwidth and low latency advantages of fiber optics directly to the end user. These cable bridge the gap between an ISP's backbone infrastructure and end-user premises, enabling high-speed internet, voice, and data service in residential. Indoor optical cables mainly include 1F, 2F, and 4F, while Household optical cables should use 1F, and Enterprise users should use 2-4F optical drop cable design. Household optical cables are divided into two types: Fiber-Reinforced plastic and steel wire reinforced.
