

Can fiber optic routers be used portably

Overview

Travel routers are just normal routers, but in portable form. This means you need to provide an internet connection the router can use, which it then makes available. While many users ask if fiber internet needs a modem, it actually. However, the story has two sides: fiber optic Internet installation is complicated, and the fiber optic cables and equipment needed are expensive. It is known for its high-speed and reliable performance, making it an excellent choice for home networks.
