

# Comparison of Cold Aisle Computer Room Manufacturers

## Overview

And like choosing between Marvel and DC, you must pick a side: Hot Aisle Containment (HAC) or Cold Aisle Containment (CAC). Hot aisle containment works like your kitchen range hood—capturing heat at its source and channeling it away. Other products include containment roof systems, aisle end doors, containment walls, cable cutout covers, AC extensions, subfloor velocity adjusters, and datacenter ceiling grates. more+ Data Center Resources is estimated to have 1-9 employees. Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing. Upsite AisleLok containment solutions and portfolio of aisle airflow management products are designed to improve cooling effectiveness and efficiency by enhancing airflow management. Separates supply and return airflow paths. Advanced cooling technologies, including liquid cooling and hybrid systems, are gaining traction for their superior heat management in high-density. What is Cold Aisle Containment and how does it help energy efficiency?

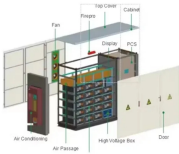

Cold Aisle Containment isolates the cooled supply air from the cooling units

within direct proximity of the air intake of critical equipment.

## Comparison of Cold Aisle Computer Room Manufacturers

	<p>Is Cold Aisle Containment Right for Your Data Center? Cold aisle containment works in virtually any data center using traditional air cooling, but some facilities see faster returns than others.</p>
---	---

	<p>AisleLok ® Modular Walls are an ideal solution for creating separation between hot aisles, cold aisles, and other areas of a data center to help contain and manage airflow.</p>
---	---

	<p>Extreme heat and cold can keep equipment from operating at peak efficiency. Explore cost-efficient and cost-effective cooling technologies and smart options for your facility.</p>
--	--

	<p>To optimize cooling efficiency, Computer Room Air Conditioners (CRAC) units are employed, leveraging different methods of distributing air such as arranging server racks in hot aisle ...</p>
---	---

	<p>Custom manufacturer of datacentercontainmentsystems. Systems provide solutions for airflow management in datacenters and mission critical facilities by isolating cold or hot aisles to increase ...</p>
