

Composite fiberglass material tail box

Overview

Our expedition bodies are made of high-strength weather-resistant fiberglass composite panels, which are lightweight, corrosion-resistant, durable and thermally insulated. We possess dedicated design and manufacturing teams for travel trailers and recreational vehicles. Composite RV boxes have many advantages over RV boxes that use wood and aluminum frame construction and fully molded fiberglass. Our composite panels combine fiberglass-reinforced polymer (FRP) skins with high-density foam cores, bonded with. Composite panels boast a multitude of advantages over other building materials, making them the ultimate choice for building your adventure rig.

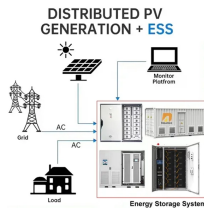

Composite fiberglass material tail box

Travel trailer shells are manufactured using high-strength fiberglass composite materials. We possess dedicated design and manufacturing teams for travel trailers and recreational vehicles. Our products ...

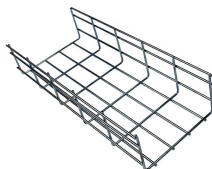

Whether you're searching for a composite truck camper, an overland camper shell, or a condensation-free 4-season expedition vehicle — Total Composites builds the ...

Strength: Despite being lightweight, fiberglass is strong and durable, making it a suitable choice for motorcycle drag racing applications. It can withstand impact and resist corrosion.

The combination of lightweight and durable materials is perfect for expedition vehicles. Our expedition bodies are made of high-strength weather-resistant fiberglass composite panels, which are ...

Discover the wide variety of panel configurations we can manufacture to meet all of your project requirements. We specialize in composite panel manufacturing using plywood core, polypropylene ...

Our custom Van Chassis boxes are purpose-built to suit your van model and build requirements. Combining a fully insulated body with high quality components leaves you with a box that is fully ...

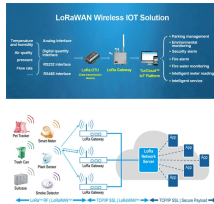

WebTelecoms Cabling
