A DAC (digital-to-analogue converter) is an audio component that converts digital music data into analogue signals that speakers and headphones can play, because human ears and audio ...

AMPCOM AOC (Active Optical Cables) and DAC (Direct Attach Cables) provide cost-effective, plug-and-play connectivity for data centers, HPC, and enterprise networks. Supports ...

Direct Attach Copper (DAC) cables are high-speed, hot-pluggable factory terminated cables designed for data center and networking applications.

Learn about direct attach copper (DAC) cables and splitters for GPU-accelerated computing. CablesTEC's Direct Attach Copper Cable (DAC) is the lowest cost solution for creating 10G-800G ...

AOC & DAC Cables High-speed cables, including Active Optical Cables (AOC) and Direct Attach Copper (DAC), are essential interconnect solutions for modern data centers, AI infrastructure, and ...

DAC vs. Ethernet Copper Cables: Traditional Ethernet copper cables, such as Cat6, are limited in terms of speed and distance. DAC cables can support higher data rates, such as 40Gbps and 100Gbps, ...

DAC stands for digital-to-analog converter and is, essentially, what converts digital audio signals into analog signals, which can be played (and heard) through speakers or headphones.

Unlock 100G performance with BizLink's DAC cables. Our direct attach cable solutions, including QSFP28, ensure low loss & high-speed data for demanding data centers.

What is a DAC? A DAC simply converts a digital audio signal into an analog one so that you can play the sound over headphones or speakers. It's that simple!
