

Does internet access require fiber optic cables

Does internet access require fiber optic cables

Many people ask this question because they're used to traditional setups involving coaxial cables and DOCSIS modems. With fiber, the infrastructure changes — and so does the hardware. Here's the ...

Unsure if you need a modem for fiber internet? Here's everything ...

Explore how fiber optic internet is installed in your home, with step-by-step details on cables, ONTs, routers, and what to expect during the appointment.

Fiber internet eliminates the need for a traditional modem. Instead, users rely on an optical network unit, which serves as the gateway between the fiber line and home devices. In the ...

First, your internet service provider will need to run a fiber optic cable from their distribution point to your home. This may involve burying the cable underground or stringing it on existing utility poles.

Instead of modulating and demodulating analog signals like cable modems, ONTs convert light pulses traveling through fiber-optic cables into ...

Unsure if you need a modem for fiber internet? Here's everything you need to know to ensure you get the right equipment for your fiber-optic connection.

Fiber internet transmits data using light signals through fiber-optic cables, which differs from traditional DSL or cable internet. Instead of a modem, fiber connections require an Optical ...

Instead of modulating and demodulating analog signals like cable modems, ONTs convert light pulses traveling through fiber-optic cables into electrical signals your home network can utilize. ...

Discover what your home needs for fiber internet. Learn about fiber optic cables, ONT, and router requirements for a fast connection.

Fiber internet, on the other hand, utilizes light pulses through fiber-optic cables, enabling significantly faster and more reliable connectivity. Because fiber doesn't use electrical signals, a ...

Your fiber internet installation technician should have some for the initial setup of your fiber network. However, for additional connections, you'll need to get your own cables to plug into your router.
