Does plugging unplugging the optical module require power off How do I connect it

Overview

Optical modules are hot swappable, and you do not need to power off the switch when replacing optical modules. Do not insert an optical module. Align the SFP module with the optical port and insert it horizontally, pressing firmly until the bottom of the module engages with the locking spring of the optical interface. This helps prevent any electrical damage during the installation. This document contains these sections: The SFP transceiver modules are hot-pluggable I/O. c.
