

Does the spare circuit in the distribution box count as a circuit

Overview

The National Electrical Code (NEC) simply requires that they be identified in the circuit directory. 4 (A) it states that “spare positions that contain unused overcurrent devices or switches shall be described accordingly. ”Can an unused (spare) circuit breaker remain in an electrical panel or does it have to be removed?

Can an unused (spare) circuit breaker remain in an electrical panel or does it have to be removed?

Spares do not have to be removed from the panel. One powers the circuit running to the pump and the other is labeled spare. Although the panel contains conductive metal bus bar. Specifically, the question posed to the task force was, “Does the 2011 edition of NFPA 70®, National Electrical Code®, and subsequent editions require properly labeled spare breakers to be kept in any specific position, either 'on' or 'off'?

” Even though NFPA 70 is silent on the issue, the. When creating an Electrical

Circuits schedule (not panel schedule), it skips over any circuit numbers that have spares and spaces assigned. I'd like to use circuit schedules for quantity takeoff of circuit breakers to submit to Panel manufacturers, but it will not count any spare breakers despite. What is a Distribution Board?
