## Overview

Our advanced robotic process winds high-performance synthetic fibers around integrated end terminations—creating cables that are 85% lighter than steel, corrosion-resistant, maintenance-free, built to last over 30 years, and. fit for purpose!EXproof BV supplies you with quality and certified explosion proof products. This range of products comprises of cable glands, accessories, thread conversions, stopping plugs, connectors, control stations, junction boxes, warning signals and lighting. Cable glands come in all shapes and sizes. EX Harsh Environment, Power, Signal and Fibre Optics Connector for Hazardous Classified Listings Class 1 Zone 1/2/21/22 The Star-Line EX® series is certified for use in a Zone 1/2/21/22 hazardous environment. Classified facilities such as petrochemical refineries and land/offshore drilling systems. Welcome to FibreMax: Redefining Cable Technology World Wide Since 2009, FibreMax has led the way in synthetic cable innovation. As the exclusive developer of the endless wound cable, we deliver unmatched strength, durability, exact dynamic stiffness and performance. TKF connects society with innovative connectivity solutions for digitalization. Carina 100Xlog is a high-efficiency retrievable fibre optic well logging service that visualizes entire

well dynamics in real-time much more rapidly than conventional technologies, reducing deferred production. Unlike traditional intervention surveillance technologies, our well logging service.

## Dutch Explosion-Proof Well Logging Fiber Optic Cable Factory

Technicians used explosion-proof enclosures to protect fiber connections in hazardous zones. The platform's subsea sensors detected leaks and abnormal vibrations quickly, improving ...

When using the applicable cable gland, it is possible to insert the cables directly into flameproof enclosures. Our high speed cables for industrial ethernet fit for dry, wet or damp rooms.

Amphenol Industrial Operations, the worldwide leader in explosion proof and hazardous environment interconnects, introduces a new, miniature, explosion-proof threaded connector specifically designed ...

Case study: Carina® 100xLog, the retrievable fibre optic well logging service, was deployed for AkerBP to identify the root causes of underperformance of a well.

EXproof BV supplies you with quality and certified explosion proof products. This range of products comprises of cable glands, accessories, thread conversions, stopping plugs, connectors, control ...

A complete well integrity monitoring system is created by combining the FEBUS A1 (DAS), the FEBUS T1-R (DTS) and the FEBUS G1-R (DSTS). Our solution offers highly sensitive devices, distributed ...

ExpressFiber is the most economic fiber solution for routine cross-well monitoring, has little to no impact on operations and can be pumped downhole in offset wells within a couple of hours.

In short, while fibre optic cables are often perceived as completely risk-free in explosion-prone areas, that is only true under certain conditions. Proper protective measures - particularly ...

At Fibremax, our production process ensures that we get the highest efficiency out of every fiber, resulting in cables with exceptional efficiency. Our FibreMax cables are custom designed, lightweight ...
