

Egyptian distribution box cable type

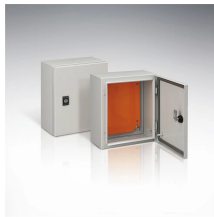

Overview

Electrical cables in Egypt vary between several types, the most prominent of which are: Low-voltage cables: used in residential and commercial buildings to deliver electricity to outlets and devices. Since then, we have grown to become one of the leading cable manufacturers in the Middle East with a strong production growth profile for cables up to 220 kV. All our products are Type Test. Leading manufacturer of high-quality cables and conductors for industrial, commercial, and residential applications. 6/1 kV, 50 Hz multi cores with stranded compact AL/CU conductors, extruded XLPE insulation, double tape armour and PVC over sheath. The cables should be used in system with solidly earthed. El Wady Cables is a company specialized in manufacturing and distributing electrical cables. The company was established in 2017, and its headquarters are located in Sadat Industrial City on a manufacturing area of more than 12 thousand square meters, in addition to design offices, laboratories. 3E product data sheets and catalogues are available to be downloaded below.
