

Fiber Optic Cable Project in Democratic Republic of Congo

Overview

The Democratic Republic of Congo (DRC) has launched a €66.55 million fibre optic cable project, a significant leap towards enhancing its digital infrastructure. Funded by the African Development Bank (AfDB), the initiative boosts the country's ambition to become a digital hub. This intervention concerns the support to the setting up and operationalisation of the National Digital Agency (ADN), the elaboration of a Master Plan for the development of broadband infrastructures and the complete feasibility studies of the Central African Fiber Optic Corridor, DRC component. The Democratic Republic of Congo (DRC) has launched a €66.55 million project. The project consists in the construction of 10,000 km of fibre-optic cables as part of a regional backbone in 5 countries, including backbone as well as metro networks. The 5 countries covered by the project are located in Central and Southern Africa and include: the Democratic Republic of Congo. Genew Technologies and Zhongshi Wosen, both Chinese companies, will help the Democratic Republic of Congo (DRC) build its fiber optic network. The Congolese Minister of Telecoms, Augustin Maliba, signed the related memorandum of understanding (MoU) on April 7, 2025.

Fiber Optic Cable Project in Democratic Republic of Congo

The Democratic Republic of Congo (DRC) has launched a €66.55 million fibre optic cable project, a significant leap towards enhancing its digital infrastructure. Funded by the African ...

The project consists in the construction of 10,000 km of fibre-optic cables as part of a regional backbone in 5 countries, including backbone as well as metro networks.
