Fiber Optic Cable Test Report 48 cores

Overview

UL LLC authorizes the above-named company (Applicant) to reproduce this report provided it is reproduced in i023 UL LLC. Fiber optic testing of a newly installed system not only verifies that the system meets its design requirements, but also creates a performance baseline for all future testing and troubleshooting of t at system. Corning recommends that all fiber optic systems be tested to a minimum set. condition. UL has not established Follow-Up Service or other surveillance of the product and also not involved in any sampl ng process. tandard length of cable is 2km/drum. C hall be similar as much as possi le. The following test items are carried out cc rding to correspondi t outer jacket and inne t outer jacket and inne t outer jacket and e o outer j t outer. Fiber Optic Testing Testing is used to evaluate the performance of fiber optic components, cable plants and systems. Wavele Two primary instruments used are the Optical Loss Test Set (OLTS) and the Optical Time Domain Reflectometer (OTDR).
