

Fiber dispensing machine

Fiber dispensing machine

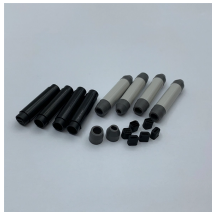

Our concrete and asphalt feeder machines are engineered to integrate seamlessly into your existing operations, providing an automated, accurate, and efficient solution for adding reinforcement fibers to ...

BAC POLYMERS INC. offers cutting-edge solutions for the Fiber Dispensing needs of the construction industry. Our team leverages the latest technologies to deliver superior, sustainable fiber dispensing ...

Dosmec™ range of fiber dispensers is a relatively cost effective solution to weigh fiber into your mix and can be added as an extra scale input in your batching controller.

Our dosing systems are designed to insert a predetermined quantity of fibers into the concrete through transport, weighing and control, with very restrictive tolerances.

Fiber dosing systems are used to automatically measure and add steel or synthetic fibers to concrete mixtures in precise proportions. These systems enhance the durability, crack resistance, and ...

Any concrete batch plant can be equipped with an automatic fiber dosing system to precisely measure and dose the required amount of fiber into the concrete batch.

The Bulk Fiber Dispenser is an automated fiber dosing system designed to accurately dispense synthetic or steel fibers into concrete batching operations. It improves consistency, reduces manual ...

Our dispensers ensure an efficient, safe, and even distribution of reinforcement fibers into your concrete mix. With high feed rate capabilities, our dispensers can satisfy large volumes of concrete in minimal ...

The UltraFiber 500® Automated Gen1 Dispenser is our simple and highly successful original design for streamlining fiber dosing. Ready Mix plants across North America trust it to deliver a consistent, pre ...

About Our Fiber Dispenser Dispenses 40 pounds of synthetic fibers per minute directly into the concrete mix Fiber is dispensed within +/- 3% accuracy On average, reduces labor costs by \$6 per fiber load ...
