

Fusion splicer splices 12-core optical cable in one go

Fusion splicer splices 12-core optical cable in one go

Splitting all those fibers out to splice individually would be time consuming, so ribbon fusion splicers, also called mass fusion splicers, can splice entire ribbons at one time, creating a splice that looks like this.

Prepared fiber ends are placed in the splicer and automatically aligned and then fused together. This method ensures greater reliability with less light being scattered or reflected back by the splice.

An expert resource for selecting the most reliable, accurate, and cost-effective fusion splicers in 2025.

Order fiber optic fusion splices and other specialty tools designed to make fiber optic splicing more efficient than ever. The splicers are designed to be used with a variety of fiber optic cables.

Our All-In-One splicers provide all 5 splicing functions including stripping, cleaving, cleaning, splicing, protecting – all in a single unit. The thermal stripper in the All-In-One system prevents cracks on the ...

This premium fusion splicer offers a strong option for in-field fiber splices that delivers superior optical performance and improved productivity. Integrated with 5 functions in one unit, the KR12A can strip, ...

Learn how to splice fiber optic cable using fusion splicing with this complete step-by-step guide. Includes tools, best practices, loss standards (ITU-T G.652), cost analysis, and FAQs for ...

Our core alignment fusion splice kits provide accurate and precise fusing of optical fiber and offer all essentials to get the job done.

Explore fusion splicers compatible with single-mode, multi-mode, and specialty fibers. Get machines with rapid splicing and integrated diagnostic tools.

Fusion splicing is the most widely used method of splicing as it provides for the lowest loss and least reflectance, as well as providing the strongest and most reliable joint between two fibers.
