

German Multimode Optical Attenuator

German Multimode Optical Attenuator

Our compact and reliable multimode VOAs provide precise attenuation levels, ensuring optimal performance in a wide range of applications in the fiber optic industry.

VIAVI offers the industry's most complete range of optical attenuators for installation and maintenance of singlemode and multimode fibers and advanced, photonic-layer solutions for lab and production ...

Strict calibration of multimode ring flux, ensuring ultra-high accuracy and repeatability in attenuation! The new generation of multi-mode programmable optical attenuator integrates years of technological ...

The N7768C is a four-channel power-monitored optical attenuator for multimode fiber applications. Its bulk-optic filter and collimated beam path is designed to assure homogeneous attenuation of all input ...

Our multimode fiber optic filter/attenuator mount is capable of holding a variety of filters and an shutter-based attenuator; it is also designed for SMA patch cables.

Based on the revolutionary OptoCeramic[®] electro-optic technology, the MM-VOAs achieve very high speeds (with a typical transition time of less than a few microseconds) in a compact solid-state device.

For integration of components with Ø 19.5 mm system mount such as 60SMS Laser Beam Couplers. Mounting plate with integrated shutter for the Schäfter+Kirchhoff multicube[™] system. The shutter ...

This type of fiber optic attenuator is ideal for multimode fiber applications because the neutral density filter attenuates all modes equally, and results in stable attenuation and linear response.

Attenuators of the FOD 5400 series are used to simulate optical attenuation when checking the optical margins of newly installed telecommunications equipment. The devices offer settings between 0 and ...

Fiber Optic Attenuators Fiber optic attenuators are devices used to reduce or monitor the power level of a fiber optic signal. Basic types of fixed attenuation include single mode, dual window and multimode ...
