

Hidden Optical Cable

Hidden Optical Cable

A new cyber-espionage technique turns ordinary internet cables into powerful hidden microphones - threatening privacy in homes and offices worldwide. When you plug in your high ...

Fiber optic cables running through your walls can be turned into hidden microphones that record every word spoken in the room. This is not a theory anymore.

Fiber optic cables, widely trusted for delivering fast and secure internet, have now been shown to pose an unexpected privacy risk. A new 2026 research study reveals that these cables can ...

Researchers at NDSS 2026 demonstrate a covert acoustic eavesdropping attack that transforms standard FTTH telecom fiber cables into passive, undetectable listening devices invisible ...

Transparent fiber optic cable offers discreet integration into interiors, maintaining structural integrity and optimal performance ideal for modern home networks seeking cleanliness and professional ...

Researchers show how standard fiber-optic internet cables can be turned into covert listening devices, capable of capturing conversations without detection.

Some researchers from Hong Kong universities demonstrate that fiber-optic internet cables can capture nearby sounds, with a small amplifier device hidden inside standard junction boxes ...

Researchers demonstrate that fiber optic cables can be exploited to eavesdrop on conversations, raising concerns about physical-layer network security.

Crucially, it is small enough to hide inside the same little plastic junction box your internet installer leaves on the wall to manage extra cable.

Researchers have demonstrated that standard telecom fibre-optic cables can be repurposed as covert acoustic sensors, effectively turning them into hidden microphones capable of ...
