

# How much does an imported laser diode cost

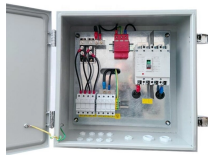

## Overview

Price range: \$1 to \$10 per unit. Applications: Applications such as barcode scanners, laser engraving, or low-power laser pointers. Semiconductor laser diodes range widely in price based on a few key parameters. The wavelength, power, spectral qualities, package type, cavity type and quantity will all have an effect on the price. But the price can also be in the tens of. Laser Diodes and Modules are semiconductor devices that can emit a beam of high intensity focused radiation, typically in the infrared, visible or ultraviolet wavelength ranges of the electromagnetic spectrum, coherently (light waves of the same wavelength, phase and direction).
