

# How often should I change my home s pigtail cable

## Overview

Electrical wiring should be replaced every 25-40 years to ensure safety and efficiency. Faulty wiring can cause fire hazards and electrical malfunction. Proper maintenance and regular inspections are essential to prevent potential dangers. In this guide, we'll share expert advice on when to replace your home's electrical wiring, key warning signs to watch for, and how to keep your electrical system. If your home is relatively new (10-15 years old), scheduling an inspection every 3 to 5 years is usually sufficient.

## How often should I change my home s pigtail cable
