

How to connect a dual-fiber router to a network cable

Overview

Connect the modem to the cable outlet with coax, then connect the modem to the router's WAN / "Internet" port with Ethernet, power on the modem first (wait for lights to stabilize), then power on the router and connect your devices to WiFi or Ethernet. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly recap why fiber optics are worth the effort: Lightning-fast speeds (up to 1 Gbps or higher). Make sure your second router supports WDS bridging or has "bridge mode." Bridging is a feature that lets two wireless routers work together to expand the range of a wireless network.
