The meaning of **PULL** is to exert force upon so as to cause or tend to cause motion toward the force. How to use pull in a sentence.

These calculations determine the maximum pulling tension, sidewall pressure, and required lubrication to prevent cable damage during installation. Factors considered include cable weight, length, conduit ...

There are many different Cable Pull Calculators available to those who prefer to use a software or an app for such planning. However, they all require certain information to perform this calculation.

The calculator will calculate the tension in each cable and provide individual capacities for each cable. Pulling Cable System - this will calculate the cable pulling tension due to the friction forces caused ...

The amount of pulling force that is exerted on a cable has a lot of effects on the cable operation. It is always observed that during installation where a pulling device is used to pull the cable, there a lot of ...
