

Huawei Cold Aisle Cabinet Certification

Huawei Cold Aisle Cabinet Certification

	<p>The structure of the module can be single-row or dual-row, and supports hot or cold aisle containment. In 2018, the Uptime Institute awarded Huawei FusionModule2000 the world's first "Tier IV Ready" ...</p>
	<p>Cold and hot aisle containment that contains cold and hot air flow and wet film humidifying technology that delivers better cooling effect, reducing energy consumption</p>
	<p>Wet film humidification*: Compared with traditional electrode humidifiers, wet film humidifiers reduce energy consumption by 95% Industry's first air-cooled smart modular DC PUE test and certification, ...</p>
	<p>As such, it's the world's first modular data center solution to obtain TIER-Ready IV certification from the Uptime Institute, recognized as the global authority on data center best practices.</p>
	<p>The top cover is opened under the effect of gravity to perform gas fire protection on the cold channel area, which is safe and reliable; Separate hot and cold air, no turbulence, no short circuit, high ...</p>

Cold aisle/ hot aisle containment technology avoids the mixture of cold and hot air, thereby significantly reduces energy consumption. For high-density scene, the row-level air conditioners are used to close ...

The company currently holds international certifications such as ISO9001, ISO14001, and CE, as well as national mandatory 3C, Taier and other certifications. Its shielded cabinets have also passed the ...

Efficient · Closely coupled cooling system, inverter PAC and contained aisle bring high-efficiency operating · AC group control function let the air-conditioners working at high- efficiency status, ...

The components of single-row aisle containment include an enclosed framework, door components, binding plates, M-shaped cable troughs, and so on. In cold and hot aisle containment, a sealed glass ...

Huawei FusionModule500 is a compact small data center solution for branch offices, integrating UPS, cooling & power systems to enable efficient, high-performance operations.
