

Huawei Data Center Cold Pool Aisle Setup

Overview

This document describes how to install the smart modular data center (smart module for short) in the dual-row aisle containment scenario. The symbols that may be found in this document are defined as follows. with simple, efficient, and reliable data center solutions. It's a modular-designed, highly integrated solution which comprises power supply, cooling, rack & structure, cabling and management system within a module, reliability and efficiency of power supply and cooling system. We have 2 Huawei IDS2000 Dual-Row Aisle Containment manuals available for free PDF download: Installation Manual Huawei IDS2000 Dual-Row Aisle Containment Pdf User Manuals. The structure of the module can be single-row. Cold aisle containment (CAC) is a proven data center cooling strategy that creates physical barriers around cold air supply zones, preventing contamination from hot exhaust air and eliminating the energy-wasting effects of air mixing.
