

Huawei Tier 3 Core Switch

Huawei Tier 3 Core Switch

Positioned perfectly as an Aggregation Switch or Core Switch, the S6730-H delivers scalability, security, and cost-effectiveness for modern digital infrastructures. These models deliver a ...

CloudEngine S16700 series switches are flagship core switches with record-high performance designed for high-quality 10 Gbps campus networks. This series stands out for ultra-fast forwarding capability ...

Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, ...

Compare Traditional 3-Tier vs Leaf-Spine architectures. Learn how to eliminate latency and scale your data center using ECMP, VXLAN, and 800G AI switches.

Every enterprise network has a silent dictator—the Huawei core switch. Buried in server rooms or data centers, this unassuming device governs traffic flow between departments, cloud ...

With multiple industry-leading intellectual properties and patents, Huawei provides more than a hundred switch models in more than 10 series, including access, aggregation, and core switching.

Next generation of high-performance, high-density Ethernet switches, offering flexible port combinations and expansion capabilities from GE to 400GE, enabling rapid service evolution for enterprises.

Realize wired and wireless convergence from access to core, manage up to 10,240 APs with a single switch, and achieve simplified O& M with unified user authentication.

Thunder link offers various models of Huawei Ethernet switches and network switches, including the S5720, S6720, S6730, CE6800 and CE12800, designed for data centers and campus networks.

In this example, core switches set up a CSS that functions as the gateway for wired and wireless users on the entire network and is responsible for routing and forwarding of user services.
