

Indonesia Red Light Source Calibration

Overview

In June this year, Indonesia's Ministry of Trade announced plans to impose safeguard tariffs of 100% to 200% on imported products ranging from footwear to ceramics, reviving measures to protect domestic industries. This move already sounded an early warning at the time, making companies. Indonesia's foreign trade sector is currently undergoing one of its most stringent regulatory phases in recent years. During the annual customs "Red Light Period", inspection intensity has surged dramatically, creating significant challenges for exporters shipping goods to Indonesia. According to Sunny Worldwide Logistics It is a logistics company with more than 20 years of transportation experience, focusing on markets such as Europe, the United States, Canada, Australia, and Southeast Asia. It is more of a cargo owner than a cargo owner~ For foreign trade personnel who have exported to. We are ISO /IEC 17025 : 2017 & ISO 9001:2015 and certified instrument calibration company that offers well defined work procedure to calibrate customer measuring instruments for compliance with International standards or manufactures specification. All Avantes spectrometers are factory wavelength calibrated and do not require recalibration as they have fixed slits

and optics. For those customers who wish to do their own.
