

Installation of protective cage for secondary distribution box

Overview

This document provides specifications, ordering information, illustrations, and application instructions for the various sizes of non-concrete and precast concrete enclosures used in PG&E electric underground secondary distribution. The Above-Ground Equipment Initiative is the result of an Advice Letter filed with the California Public Utilities Commission (CPUC) by SCE that was approved by Resolution E-4329 on April 22, 2010. Effective August 2, 2010, new equipment on private property is now required to be installed above. Since 1995, we have been making high quality security enclosures to protect small and large backflow assemblies. Our original, signature rounded design, provides superior strength and safety without any sharp corners. Whether in a home or an industrial facility, this box keeps your electrical setup organized, functional, and efficient.

Installation of protective cage for secondary distribution box
