

Intelligent PDU network port

Intelligent PDU network port

The Intellinet Network Solutions 19" Intelligent 8 Port PDU provides your system-critical devices with steady power, monitors current-voltage levels and keeps track of environmental temperature and ...

Rack PDUs that have the ability for aggregate power monitoring and outlet level switching capabilities for individual outlets or a group of outlets. Enabling power sequencing, rebooting equipment or restrict ...

Modular, compact intelligent PDU with inlet metering. Ultra-Low Profile Design. Reduce IP addresses by Daisy Chaining up to 64 PDU's.

Smart PDU for your network The Intellinet Network Solutions 19" Intelligent 8 Port PDU provides your system-critical devices with steady power, monitors current-voltage levels and keeps track of ...

An Intelligent PDU allows for remote management, monitoring of PDU vitals, and control of outlets and networked clients. Power status can be monitored over the network, using the NetAgent ...

All Panduit G5 Intelligent PDUs feature a Rotatable or Hot Swappable Intelligent Network Controller (iNC). This centralized piece of intelligent hardware receives an IP address, contains a ...

It is built with the IMD-03X module, which provides dual ethernet ports and a local display. The IMD-03E uses the Enhance Communication Card (ECC) that adds a Remote Sensor Port for the connection of ...

Traditionally, each intelligent PDU in a rack would require the use of one port on a network switch. The cost associated with providing a network connection to each PDU can be hundreds of dollars.

The TFT display provides local power information or the PDU can be remotely monitored through the network port via the internal web browser or over SNMP and Telnet, plus others.
