

# Internal Network Firewall Core Switch

## Overview

For enterprise network architects and senior infrastructure engineers, determining where Layer 3 routing logic should reside—on the core switch or the Next-Generation Firewall (NGFW)—is a foundational design decision. The stack is connected to two Secure Firewalls 3105. If segmentation is your goal, some of the newerish solutions like NSX, DNA or ACI for the DC. A misstep here can either cripple network performance with unnecessary. When it comes to enhancing network security, the placement of firewalls can deeply influence not just protection measures but also network performance and management. Whether at the edge of your network or at its core, the location you choose for firewall deployment carries its own set of. but as you know the NGF, can act as IDS and IPS, what if any malicious activity. in the users VLAN and the traffic goes to the servers VLAN, it is preferred in this situation to add the firewall as getaway for this VLAN. As there is no routing is done in the.
