

Iran OTDR Test Module Handheld

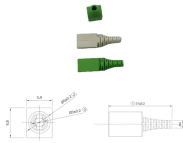

Overview

The JDSU / Viavi T-BERD 2000 is a handheld multi-test platform that provides field technicians with a single handheld unit to install, turn-up and maintain these networks to the highest standards. Maintain connectors and Lasers and pigtailed. Validate measurement accuracies conform to published. Fully featured, entry-level, dedicated OTDR with tablet-inspired design perfect for frontline singlemode fiber installers. The MaxTester 700D OTDR Series comes with a Swap-Out connector which can easily be changed, as and when needed, without having to send the test unit to a service center. The T-BERD 2000 is a compact, rugged, and highly versatile fiber test platform built for technicians. Source: ShinewayTech Date: 2020-04-07 Read: 21,316 Hand-held High Performance OTDR ShinewayTech® MTP-200X series is the compact multi-functional platform, with 8 inch high-resolution touch screen, which are specially designed for FTTx / WAN applications and can meet all test requirements of. The SmartOTDR essential handheld fiber tester is an affordable, easy-to-use device for techs at any level, with robust wireless connectivity options that increase productivity anywhere.

Iran OTDR Test Module Handheld

OTDR, short for optical time-domain reflectometer, is an optoelectronic instrument used to characterize an optical fiber. It can offer you an overview of the whole system you test and can be used for ...

Jonard Tools' Multi-function OTDR is the perfect all-in-one handheld device for evaluating FTTx and access network construction and maintenance, identifying fiber breakpoints, measuring cable length, ...

It integrates all the essential fiber test requirements into a single device with OTDR measurement, fiber end face analysis, optical loss testing and visual fault locator.

Jonard Tools' Multi-function OTDR is the perfect all-in-one handheld device for evaluating FTTx and access network construction and ...

The T-BERD/MTS-2000 provides the largest range of test capabilities offered in one handheld unit. The modular design allows service providers the maximum flexibility to scale their investment and evolve ...

The lightweight and compact SmartOTDR speeds and optimizes field testing of metro and access networks—with a tailored OTDR interface and automatic analysis that any technician can understand.

The JDSU / Viavi T-BERD 2000 is a handheld multi-test platform that provides field technicians with a single handheld unit to install, turn-up and maintain these networks to the highest standards.

VIAMI provides the widest range of OTDR testing tools delivering everything from basic fiber certification to fully automated bidirectional OTDR testing that scales for multi-fiber cable certification.

Fully featured, entry-level, dedicated OTDR with tablet-inspired design perfect for frontline singlemode fiber installers.

MTP-200X is a portable and versatile OTDR test platform with 8" touch screen, dynamic range up to 50dB.
