Overview

Click to get your 40G QSFP+ transceiver modules from nearby warehouses. Trusted by 260K+ Enterprise Users. The Quad Small Form-Factor Pluggable (QSFP) family represents a critical evolution in high-speed optical transceiver technology for data centers, telecommunications networks, and enterprise infrastructure. These hot-pluggable transceivers provide high-density, high-performance connectivity. Cisco QSFP-DD and OSFP 800G ZR/ZR+ digital coherent optics modules enable 800G traffic over amplified Dense Wavelength-Division Multiplexing (DWDM) links up to 120 km for 800ZR and over 1000 km for 800G ZR+. They can also be deployed in third-party and white box switches and routers to provide market-leading integrated coherent transport solutions. We provide a large range of simple and customizable design options.
