

Mosa Industrial Switch 5150

Mosa Industrial Switch 5150

The Moxa NPort 5150 is a true industrial grade serial device server (serial to ...

The Moxa NPort 5150 is a true industrial grade serial device server (serial to Ethernet Converter). It is ideal for connecting any serial RS232, RS485 or RS422 device to your computer over an Ethernet ...

Overview NPort® IA device servers, NPort IA-5150, provide easy and reliable serial-to-Ethernet connectivity for industrial automation applications.

The NPort IA5150A/IA5250A series of device servers deliver easy and reliable serial-to-Ethernet connectivity for the industrial automation market. The NPort IA5150A/IA5250A series is designed to ...

The NPort IA5150 and IA5250 device servers each have two Ethernet ports that can be used as Ethernet switch ports. One port connects directly to the network or server, and the other port can be ...

Our comprehensive portfolio includes unmanaged switches, managed switches, PoE switches, rackmount switches, and EN 50155 switches designed for use in the rail industry.

The NPort IA5150A excels in providing reliable, secure, and easy-to-manage connectivity for a wide range of industrial applications, enhancing operational efficiency and system resilience.

The NPort IA5000A series is not only hardware upgrade, but in addition, the device server's software tools are more versatile and user-friendly. The NPort IA5000A device servers deliver easy and ...

The NPort IA5150 and IA5250 device servers each have two Ethernet ports that ...

One port connects directly to the network or server, and the other port can be connected to either another NPort® IA device server or an Ethernet device. The dual Ethernet ports help reduce wiring ...

The NPort IA-5150-M-SC is a 1-port RS-232/422/485 device server with 1 100BaseF (X) multi-mode port (SC connectors) and 0 to 55°C operating temperature. NPort IA5000 device servers provide rock ...

NPort® IA device servers provide easy and reliable serial-to-Ethernet connectivity for industrial automation applications. The device servers can connect any serial device to an Ethernet network, ...
