

Municipal Secondary Distribution Box

Municipal Secondary Distribution Box

A distribution box is a small concrete or plastic junction box installed between your septic tank and drain field that splits outgoing wastewater evenly across multiple leach lines.

Here we give septic system D box installation, specifications, inspection, diagnosis, and repair, and we explain how to find the septic distribution box, drop box, or D-box by any of several methods.

Plastic septic distribution boxes are light weight for easy installation and provide longer life when compared to concrete. Shop our septic distribution box options today!

Choose from 5 heights to set your inlets and outlets on each side. It also comes complete with the only seal on the market that accepts 2", 3", 4" smooth wall and corrugated pipe. No more different fittings ...

Modular zone distribution system for raised floors, improving cable management and installation.

The distribution box, also known as the D-box, is a junction box positioned between the tank and the drain field. Its primary function is to evenly distribute the septic tank effluent (wastewater) from the ...

Advanced Drainage Systems, Inc. (ADS) Distribution Box distributes effluent from the septic tank into various sewer and drain pipes. The effluent then flows into the leach field.

Generally, first level distribution does not allow direct use of electrical equipment, and second level distribution will be by power equipment because it is three-phase electricity, while third ...
