

## Nicaragua Modular Data Center Construction Case Study

## Nicaragua Modular Data Center Construction Case Study

Learn how prefabrication is revolutionizing data center construction, offering numerous advantages that streamline the building process.

Like all of Flexenclosure's modular eCentre data centers, the building is manufactured in the company's Swedish plant before being shipped to the final construction site.

This case study focuses on a telecom infrastructure project in Nicaragua where site access, transport limitations, and long-term durability were the key engineering constraints.

Explore the interactive map below using your mouse to zoom in on specific locations, or narrow your search by choosing a building category from the menu on the left side of the map. You can also ...
