

No-Jumper Fusion Spinner Diagram

No-Jumper Fusion Spinner Diagram

Ready to design your own fully working fidget spinner? In this Fusion 360 tutorial, I'll walk you step-by-step through creating a clean, functional spinner using essential CAD tools.

Designing Fidget Spinners in Fusion 360: I have recently been learning how to use Fusion 360 on the Instructables class, though up until now I have only designed very simple parts.

Design and draw one arm of the fidget spinner. Use the circular copy to repeat for the number of arms that you want. Extrude the required areas. Render the fidget spinner in the material and colors of ...

How to Design a Fidget Spinner: There's no shortage of fidget spinners on the internet, but here's an instructable to show you how to design your own in Fusion 360.

Find everything you need to make smart design choices for your next project. Search over 16 million verified symbols, footprints, and 3D models. Browse intelligent reference designs from participating ...

I'm jumping on the fidget spinner bandwagon and showing you how to EASILY make one in Autodesk Fusion 360 in 5 MINUTES. I printed mine on the BCN3D Sigma R17 using ...

In the fourth video tutorial below, you will continue to add to your Fusion 360 skills and create a fidget spinner design. You may design an identical spinner to the one shown in the tutorial...

In this video, I demonstrate how to model a Fidget Spinner in Fusion 360 using Circular Pattern and Full-Round fillet features.

This is just a simple planetary gear mechanism. It has no carrier so the planets had to be designed to be "self-aligning". Fusion has a nice spur gear generator add-on but I can't figure out ...
