Price of Filler Rope Optical Cable Equipment

Overview

Price and other details may vary based on product size and color. Need help?

The PP filling rope of 20000D is typically utilized in optical cables. Filling materials are employed to occupy the internal space of the cable, providing protection and structural support to the optical. The cable filling rope field comprises multiple distinctive types of machinery that serve separate manufacturing purposes in cable production. Three primary types of such machinery are extrusion machines, stranding machines, and coiling machines. We offer unique application solutions for manufacturers, operators and installers of cables through an international network of manufacturing sites, supported by regional sales offices.
