

Quality of North Korean Customized Fiber Optic Communication Equipment

Overview

Get custom optical transceivers, DAC/AOC, WDM, and fiber cables backed by 10+ years of expertise, global standards, and hassle-free OEM/ODM services. Expanded Beam technology uses a lens system to expand, collimate, and refocus the optical signal from the transmitting fiber into the receiving fiber without physical contact. This method reduces sensitivity to dirt, debris, vibration, shock, misalignment, and physical wear, making expanded beam. Founded in 2005, KOC Communication Company has 15 years of experience in providing a full range of necessary equipment for telecommunication applications. The portfolio ranges from solutions and equipment for enveloping, sleeving, wrapping & stacking, cast-on-strap to the assembly of automotive, motorcycle, industrial, and e-mobility batteries.

Quality of North Korean Customized Fiber Optic Communication Equ

Fiber Optic Korea is a leading specialized company in the global optical fiber industry.

Within our factory, we operate first-class equipment and have an expert manufacturing history of nearly 2 decades, allowing us to provide top of the line fiber optic cables, fiber connectors, fiber optic ...
