After the downgrade from STM-4 services to STM-1 services, you can use a 155 Mbit/s or 622 Mbit/s optical module. If the STM-1 line board uses a 622 Mbit/s optical module, the ...

This section describes the board specifications, including the port performance, dimensions, weight, and power consumption. Table 1 and Table 2 lists the technical specifications of the SL1D.

Working Principle and Signal Flow This section
describes how to process one STM-1 optical signal,
and it serves as an example to describe the
working principle and signal flow of the
SL1D/SL1DA.
