

ST Interface Industrial Switch

ST Interface Industrial Switch

ADAM-6521/ST-AE 5-port Switch w/1 M-Mode ST Type Fiber Port Provides 4 x 10/100 Mbps Ethernet ports with RJ-45 connector Provides 1 x 100 Mbps multi/single-mode fiber port with ST connector ...

These octal high-side switches save space, enhance reliability, and are ideal for factory automation in PLC modules, vending machines, and CNC systems. Built-in protection and diagnostics allow control ...

The new galvanically isolated octal high-side switches feature diagnostics control and protect industrial loads.

Explore ST's galvanically isolated intelligent power switches: 8-channel, high-side design with dual voltage domains and flexible SPI/parallel control interface. Ideal for reducing BOMs, saving PCB ...

Our secure connectivity and sensor technologies can serve as the platform on which Mobility services can be built to improve safety and convenience. Discrete & Power Transistors ST offers products and ...

The device enlarges ST's family of galvanic isolated high-side switches, featuring maximum safety and robustness in demanding applications such as industrial PLCs, PCs, or peripherals, and numeric ...

STMicroelectronics has launched a family of octal high-side switches that combine galvanic isolation for robustness, RDS (on) below 260mΩ for energy efficiency, and protection and ...

These devices integrate the control section (logic interface, drivers, diagnostic and protection features) and the power stage on the same chip, with benefits in terms of compactness, increased system ...

ADAM-6521/ST-AE 5-port Switch w/1 M-Mode ST Type Fiber Port Provides 4 x 10/100 Mbps Ethernet ports with RJ-45 connector Provides 1 x 100 Mbps ...

S.T. Industrial (Asia) Limited specializes in R& D, manufacturing and sales of precise switches, offering high-quality products and professional services.

E-Switch's ST series industrial power toggle switches can be ordered prewired with wire leads, eliminating in-house labor or second source assembly needs.

The new galvanically isolated octal high-side switches feature diagnostics control and protect industrial loads.
